

May Cohen Lecture In Women's Health

March 21, 2018

Gillian Einstein, PhD

Wilfred and Joyce Posluns Chair in Women's Brain Health and Aging

University of Toronto

Associate Professor, Department of Psychology

Associate Professor, Dalla Lana School of Public Health

Guest Professor of Neuroscience and Gender Medicine, Linköping University, Sweden

Female genital circumcision/mutilation/cutting (FGC) is often considered only in terms of its effects on the reproductive system and sexual health. In this talk I use a feminist science approach to consider how this gendered practice affects other body systems, in particular, the nervous system and in this way, move the conversation from women's genitals to their brains.

“The World Writes on the Body: A Feminist Perspective on Immigrant Women's Health”

**Added feature! See a Short Preview of
“The Gender Lady: The Fabulous
Dr. May Cohen”**

**A documentary film by Drs. Cheryl Levitt &
Barbara Lent**
